

## WEEKLY REPORT

### **Work done in last week (Attach supporting Documents):**

1. Extending the database schema for adding other departments and managing the departments according to the relationship existing between them.
2. Adding HR department which can manage the current employees and can keep a record of prospective employees.
3. Backend development and database connectivity of the vendor department.
4. Database Design for the system.
5. After testing on various test cases, several bugs were discovered, which were solved.

### **Reason for incomplete work:**

1. N/A

### **Plans for next week:**

1. Creating a new project and performing CRUD operations using laravel framework and understanding the flow for future purposes.
2. Adding functionality of uploading images with the help of laravel.
3. Fund Request page for different department to request certain amount of money required for transactions related to the organization.
4. Fund Status page for Account department so that that they can approve/reject a fund request made by various departments of the organization and can keep a record of the same.
5. Added the Search functionality to the Available Applicants page under HR department so that an applicant can be found among the list of many applicants with an ease.
